PROJECT

Acoustic Barrier wall for residential project

PRODUCT

DESCRIPTION OF JOB

Quick Built Systems was chosen to supply the Acoustic wall panels for a new fence for a quality housing development in Harrington Grove. The Quick Built fencing panels were chosen as this development has very strict guidelines for the appearance and quality of fencing products used. The quality of the Quick Built Panels provided the whole community with an exclusive look and feel adding real value to the properties involved.

The Panelspan panels used in the Quick Built System not only provide a high acoustic sound barrier but also have the look and feel of a masonry fence at a fraction of the cost. No need for expensive footings and formwork with our unique Quick Built Fencing System.

This fence was painted in Dulux Weathershield providing an inexpensive and quality look to this signature project.

Call Quick Built Systems now for an obligation free quote. Add value to your property with the Quick Built Acoustic Panel Fencing System.
