PROJECT

Acoustic Barrier wall for residential project

PRODUCT

DESCRIPTION OF JOB

Quick Built Systems was chosen to supply the panels for a new fence in Byron Bay.

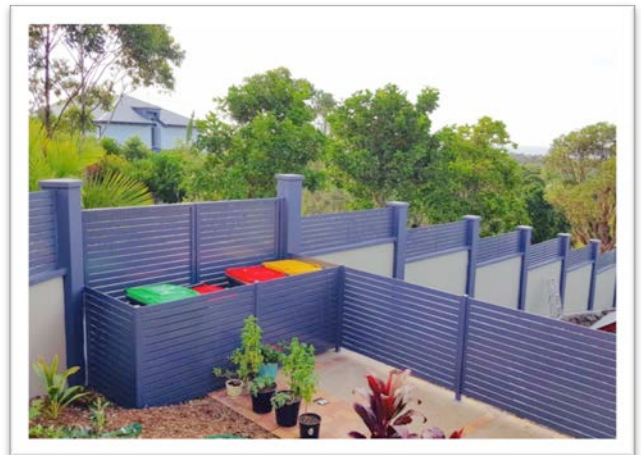

The clients were after the look of a rendered brick fence, but after a lot of research, they discovered 'Quick Built Acoustic Fencing System' and realised not only could they achieve the rendered brick fence at the fraction of the cost and time to build, but they would also get the added benefit of an acoustic sound barrier to help eliminate any noise from the road.

Grandline Acoustic Fencing System gives clients ease of installation, with no need for expensive footings and formwork, which make it a quick and cost effective fencing solution.

The Grandline Fence includes a larger post system that closely resemble posts included in a brick wall with larger piers.

Call Quick Built Systems now on 1300 132 787 for an obligation free quote. Add value to your property with the Quick Built Acoustic Panel Fencing System.
